SUMMARY

Results-driven IT Developer with 7+ years' experience in banking software development and systems integration. Proven track record in delivering secure, high-performance applications for financial institutions, including compliance-driven systems such as e-KYC, cross-border forex reporting, and electronic document workflows. Skilled in full SDLC — from requirements gathering and coding to testing, deployment, and end-user support. Proficient in C#, Java, JavaScript, ASP.NET, SQL, and Python, with additional experience in micro services, containerization (Docker/Kubernetes), and CI/CD pipelines. Hands-on background in database management (SQL Server, MySQL) with exposure to Oracle environments and banking applications. Adept at mentoring teams, producing technical documentation, and training end-users. Strong knowledge of Agile/Scrum methodologies, risk management, and secure software development practices, ensuring operational efficiency and regulatory compliance in the banking sector.

SKILLS

- **Programming & Development:** C#, Java, ASP.NET Core, JavaScript, Python, R, Flutter/Dart
- **Banking Application Development:** e-KYC, Forex Reporting Systems, Document Digitization, EMR Systems
- **Databases & Middleware:** Microsoft SQL Server, MySQL, Oracle (exposure), API/Web services integration
- **Systems Integration & Architecture:** Micro services, containerization (Docker, Kubernetes), middleware integration
- **Development Practices:** Agile/Scrum, version control (Git), CI/CD pipelines (Jenkins), automated testing
- **Information Security & Compliance:** Secure coding, regulatory reporting systems, risk-aware development in financial services
- **Documentation & User Support:** Technical handbooks, training end-users, mentoring junior developers, stakeholder communication
- **Project & Team Leadership:** End-to-end project delivery, stakeholder alignment, team mentoring, cross-functional collaboration

WORK EXPERIENCE

NBS Bank limited

Lilongwe, Malawi

Senior Software Developer

Jan 2020 – Sept 2024

- **Leading end-to-end development cycles**, from requirements gathering and system design to implementation, testing, and deployment, ensuring high-quality deliverables on time and within budget.
- **Mentoring and guiding junior developers**, providing technical leadership, code reviews, and fostering a collaborative environment that emphasizes continuous learning and innovation.
- **Optimizing application performance** through refactoring code, identifying bottlenecks, and implementing cutting-edge tools and technologies, resulting in a significant reduction in processing time and improved system reliability.
- **Collaborating closely with product managers, QA teams, and stakeholders** to align technical solutions with business needs, ensuring a seamless user experience and customer satisfaction.
- **Integrating modern software development practices**, such as micro services architecture, containerization (Docker), and automated testing frameworks, to improve scalability, reliability, and maintainability of applications.
- **Managing version control and deployment pipelines** using tools like Git, Jenkins, and Kubernetes, ensuring smooth and efficient code releases with minimal downtime.
- **Driving innovation** by researching and implementing emerging technologies (e.g., machine learning,

AI) to enhance product functionality and business value

St Johns DMI University, Lilongwe campus

Part Time Lecturer, Computer Sciences

Aug 2021 – Oct 2024

- **Devise and implement comprehensive course materials**, ensuring alignment with academic standards and learning goals.
- **Conduct educational sessions** that enhance student comprehension and engagement within the field of computer science.
- **Integrate current technological tools and software** into instructional methods, while offering personalized guidance and academic support to students.
- **Assess student performance** through regular assignments, exams, and projects, providing constructive feedback to foster academic growth and ensuring adherence to grading criteria and department policies.
- **Mentor and advise students** on academic and career paths, assisting with research projects, internships, and professional development opportunities in computer science.
- **Collaborate with faculty colleagues** to develop, refine, and update curriculum materials, ensuring that the computer science department offers relevant and cutting-edge courses that meet evolving academic and industry need
- **Publish academic research or participate in professional activities** related to computer science, contributing to the field through scholarly articles, presentations at conferences, and collaboration with industry professionals
- **Participate in departmental meetings, workshops, and conferences**, contributing to curriculum development, institutional research, and maintaining high teaching standards.

Baobab Health Trust

Software Developer

Lilongwe, Malawi

Oct 2016 - Sep 2019

- **Collaborative efforts with project managers and stakeholders** to establish clear project parameters, requirements, and goals, ensuring alignment and focused development efforts.
- **Offered expertise and mentorship to team members**, enhancing their problem-solving capabilities and fostering skill development through comprehensive code reviews and adherence to best practices.
- **Assessed and integrated new tools, frameworks, and technologies**, optimizing the development process and proactively addressing potential technical risks.
- **Collaborating closely with product managers, QA teams, and stakeholders** to align technical solutions with business needs, ensuring a seamless user experience and customer satisfaction.

EDUCATION

Manipal Academy of Higher Education, INDIA

2023

Master of Business Administration, Data Science

Amity University

2014

Bachelor of Science in Information Technology

PRACTICAL ACHIEVEMENTS AND EXPERIENCE

- I participated in the development and implementation and deployment of Civil Registration System for Malawi Government (NRB). Technologies used: Ruby on Rails
- I led a team in the development and implementation of NBS bank electronic Know-your-customer software (e-KYC). Technologies used: Microsoft ASP.net core 3.1.

- I developed a document digitization app (DDA) to replace paper based manual workflows which led to 45% operational cost savings.
- I developed the CFERS system (Cross border forex exchange reporting system) for NBS bank that improved reporting of the bank to the central bank to ensure compliance with banking regulations.
- Participated in the development and implementation and deployment of the Baobab Health Trust EMRS (electronic medical record system) for the Malawi government hospitals nationwide.

REFEREES

- Mr. Ryan Nchingula, National Bank of Malawi, P.O. Box 945, Blantyre | Phone: 0999 416 750
- Mr. Jacob Mbendera, NBS Bank Limited, P.O. Box 53221, Blantyre | Phone: 0998 212 214
- Mr. Pachawo Bisani, Light House Trust Malawi, Lilongwe | Phone: 0999 221 620
